Edison Convenience and Meter panels

Edison Convenience Option

The primary components are Edison 20a Duplex outlets in White, Black, Red and Blue and 20a Push to Reset breakers. Two and four circuit units have two plugs per circuit. Three and six circuit units have one plug per circuit. Single phase units color code breakers black and red. Three phase units color code breakers black, red and blue. Panel construction is made from Mild steel, Powdercoated black w/ standard EIC rack holes.

Meter Panel Option

The VA5 meter is a dual display featuring Voltage and Amperage. The VA52 is a single phase panel connected to the X & Y phases. The VA53 is a three phase panel connected to the X, Y and Z phases. The enclosed housing uses plug and play phoenix connectors for power input and amperage coil connections. The entire panel is covered by the manufacturers limited lifetime warranty and is designed and built to be "hot swappable.". Panel construction is made from Mild steel, Powdercoated black w/ standard EIC rack holes.
