16g Mild Steel Blank Filler Panels

CONSTRUCTION

PNP Stock panels are manufactured for the audio visual and entertainment industry. The panel is fabricated from a standard 16 gauge mild steel (.060 thickness) using a UHP Waterjet cutting machine. All steel panels have upper and lower 90 degree bent flanges to add structural integrity to the mounting surface. Polyester Epoxy Powdercoating (Black) covers both sides. Rack mount holes are at either end allowing panel to be used on any standard IEC rack rail and equipment racks. Panel conforms to standard IEC unit measuring width (19"/482.6mm) allowing panel to be combined with any other manufacturers IEC panel. Rounded corners are present on all 90 degree turns and radiuses.

APPLICATION

Panels are sized based on panel height in 1.75" increments (1U 1.75" height, 2U 3.5", etc) Mounting holes are provided to allow standard 10/32" mounting screws. Panel mount holes (to attach panel to rack rail) are 1/4"x1/2" rounded slots allowing standard 10/32" mounting screws or required screws conforming to applied rack rail.
