

# HalfRack Miniature Rack Distro

## Cutsheet

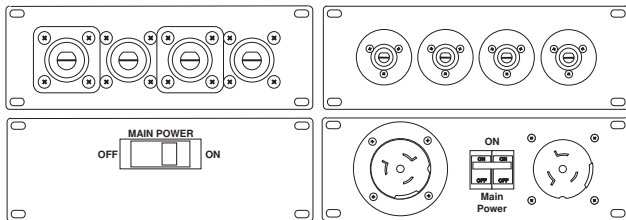

### DESCRIPTION

Half Rack is a miniature rack system based around 10.5" wide rack panels. The rack panels have the same construction and surface coating as standard panels. The commercial racks have an 8" depth between rack rails with trim, corner guards and handles. Available in two sizes, 6U (10.5") and 8U (14")

The half rack distros are small enough to fit in the backseat or in the trunk with lid closed.

### INPUT PANELS

Series 15 (150a) and Series 16 (400a) Camlocks are available in multiple single phase configurations. Pass thru cams have snapcovers for safety. 1/O and 4/O wiring lugs provided internally. 50a (CS6375) and 30a (L14-30) are also optional input panels.

### MAINS BREAKER

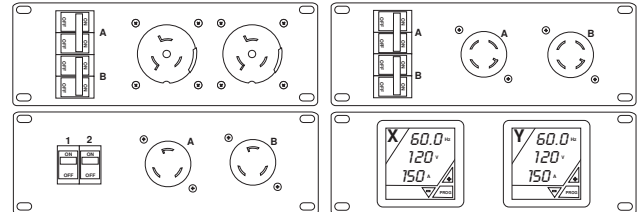

Multiple Mains Breaker panels as well as twistlock input with breaker are provided as an option. Twistlock/breaker panels have same connector type pass thru.

### BLOCK BUSS

Multiple panel mount buss option are provided as wiring locations for panel termination. A variety of configurations are displayed for most panel combinations.

### TWISTLOCK/BREAKER

Single phase wired twistlock panels are available in CS6369, L14-20, L14-30, L6-20, L6-30, L5-20 and L5-30. Appropriate amperage breakers are prewired to connector with standard gauge wiring.

### METERS

The AM2 meter panel provides voltage, hertz and amperage for two separate phases. Ring current transformers are also provided for current measuring.

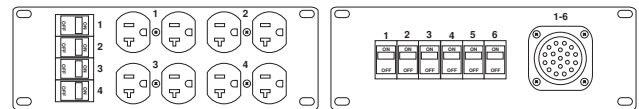

### POWERCON

Powercon 20, True and 32 are provided in dual and quad panels with breakers.

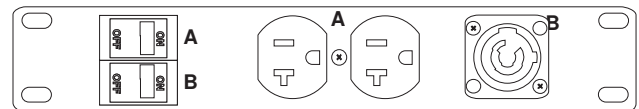

### EDISON SOCAPEX

Edison panels are provided in -3-way and 4-way with breakers. Soca 120v with breakers and soca 220v with breakers (3U panel) are also available.

### BLANK, STOCK AND CUSTOM

Blanks are available in 1-4U sizes. Stock panels (assemblies without breakers/wire) are also available for everything shown.

Custom panels are always available based on the clients requirements. Clients should feel free to request items that are not shown or priced and displayed.
