XBrick Portable Drop Box

Simple stage drop box with several variations. XBrickN is an input only brick using a pass thru chassis with extra hole capped, (3) white 20a U-ground duplex receptacles featuring (11) male input connectors. XBrickP adds a female pass thru flanged receptacle, XBrickB adds (6) PTR (push to reset) breakers offering circuit protection at the box location. Unique hole pattern allows input or pass thru to be swapped with virtually any other twistlock connector. Mild steel chassis, powder coat black with blackened sheet metal screws.
